## 5

A self-service terminal (10) having a simplified user interface (20) comprises a plurality of indicators (28) for entering a transaction. Each indicator (28) has a unique attribute, such as size, shape, color, surface texture, or sound. Each indicator (28) is associated with a pre-defined transaction, so that a user can enter a transaction by selecting a single indicator (28). A method of using the terminal is also described.
